Log in

Accounts and roles: Admin in Django admin.

B · Sync running (Refresh, first open, after PR, snapshot > 5 min)

Loading orders from SAP for [PLANT]...

Refresh disabled while running. Target: within 5 s on a cold sync.

C · Sync failed, older snapshot exists

SAP could not be reached.

Showing data as of 02 Nov 09:51.

Try again

Table stays usable; requisitions can still be created.

D · First sync for a plant failed

No data for plant [PLANT] yet

The first sync with SAP failed, so there is nothing to show. This is usually temporary.

Timeout after 10 s · 02 Nov 10:14

Try again

Choose another plant

E · Not allowed (e.g. Viewer posts a requisition directly)

403

You don't have permission for this

Your role (Viewer) can view orders, the dashboard and requisitions. Ask an admin if you need to create requisitions.
